CONDITIONS OF SUPPLY

All goods supplied by us are of a high grade and we believe them to be suitable, but as we cannot exercise control over their storage, mixing or use, all conditions and warranties, statutory or otherwise as to the quality or fitness for any purpose of our goods are excluded and no responsibility will be accepted by us for any damage or injury whatsoever arising from their storage, handling, application or use.

TRAIL-TRACKS is a Trademark of De Sangosse Ltd.

TRAIL-TRACKS - LABELLING/CLASSIFICATION

The (COSHH) Control of Substances Hazardous to Health Regulations may apply to the use of this product at work.

OPERATOR PROTECTION

Engineering control of operator exposure must be used where reasonably practicable in addition to the following personal protective equipment: **WEAR SUITABLE PROTECTIVE CLOTHING (COVERALLS), SUITABLE PROTECTIVE GLOVES AND FACE PROTECTION (FACESHEILD)** when handling the concentrate. However engineering controls may replace personal protective equipment if a COSHH assessment shows they provide an equal or higher standard of protection.

IRRITATING TO EYES AND SKIN

IN CASE OF CONTACT WITH EYES: rinse immediately with plenty of water and seek medical advice.

AFTER CONTACT WITH SKIN, WASH IMMEDIATELY with plenty of water.

WHEN USING DO NOT EAT, DRINK OR SMOKE.

ENVIRONMENTAL PROTECTION

DO NOT CONTAMINATE SURFACE WATERS OR DITCHES with chemical or used container.

DO NOT EMPTY INTO DRAINS; dispose of this material and it's container in a safe way.

STORAGE AND DISPOSAL

KEEP AWAY FROM FOOD, DRINK AND ANIMAL FEEDING STUFFS.

KEEP OUT OF REACH OF CHILDREN

WASH OUT CONTAINER THOROUGHLY, and dispose of safely.

RATE OF USE

Use Trail-Tracks at a concentration of 1% (e.g. 100 ml in 10 litres of water) in a foam generating system.

MIXING

Bottom fill tanks: Add Trail-Tracks to clean water at start of filling.

Top fill tanks: Trail-Tracks should be added to clean water when the tank is half full. The fill hose should be below the water level until filling is completed.

DIRECTIONS FOR USE

To produce long lasting and clearly visible white foam, Trail-Tracks should be deposited on the ground in large blobs rather than narrow streaks. This may mean increasing the diameter of the hose extending along the boom as the size of the foam blobs is dependent on the pressure and the diameter of the boom and end drop hoses.

Trail-Tracks can be used with all water types but will be especially effective in hard water areas.

In the mixing tank Trail-Tracks is not compatible with traces of other bout markers so a thorough clean out and rinse must take place before use. Foam generating equipment should be cleaned with De Sangosse's Tank and Equipment Cleaner before introducing Trail-Tracks.

The air pressure (1.0-2.5 bar) should be adjusted to produce thick, fine bubble foam. Should foam produced be too thick, reduce the amount of Trail-Tracks added to the water in the next mix. If the foam produced is too thin, soft or watery, increase the amount of Trail-Tracks used. If foam consistency is poor, check for malfunction or contamination in the foam generating system.
